**About Us**

**Our Story**

**Products**

**Contact Us**

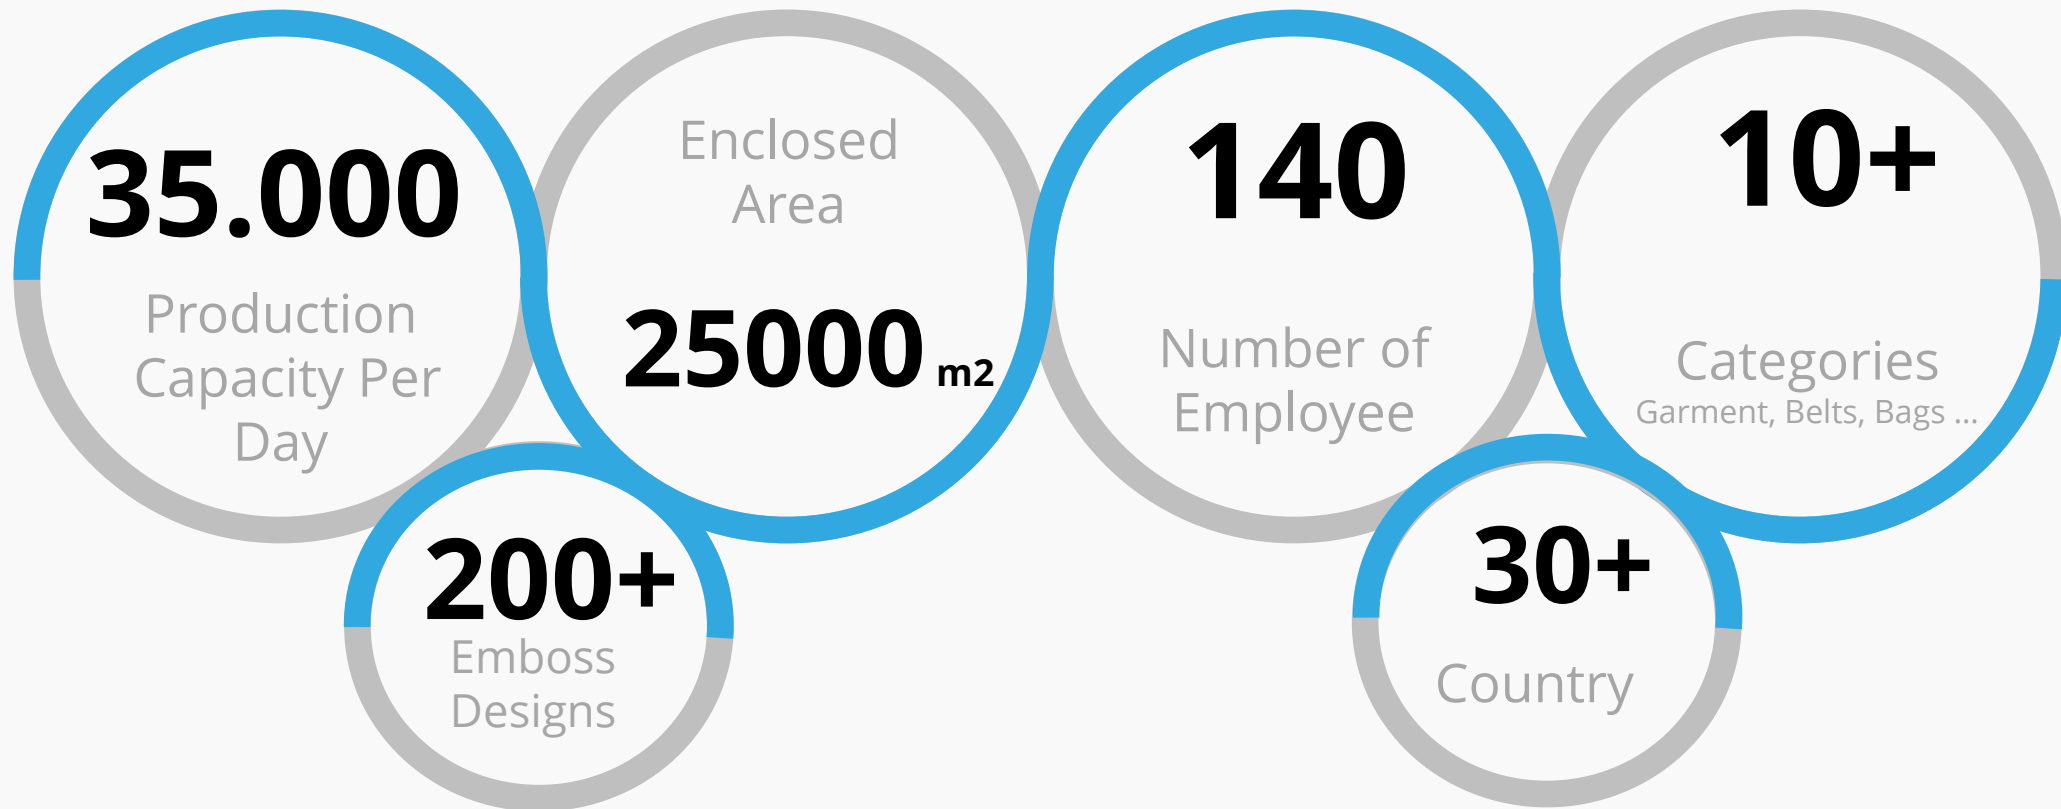

Sonart was established in 2010 and our company plays an important role in faux leather, slipper and PU sole manufacturer in industry. Our factory built on 25.000m<sup>2</sup> area is equipped with state-of-art machinery park capable of meeting different scale demands. (Crib 5, Anti Bacterial, Easy Clean, UV Resistance, etc...)

Our manufacturing facility has the capacity to produce 20.000.000MT artificial leather, 10.000.000 pairs of PU sole and 7.000.000 pairs of slippers per year. Our broad product range includes artificial leather for shoes, bags, furnishing, flooring, clothing, automobile upholstery, belts and accessories.

## Proforma Payment

%30 percent of total amount will be taken before production begins.

## Production Period

## Shipment

According to client specifications, we are ready to ship your products..

# Product Features

## Sunlight Resistance

Thanks to this feature, which is generally preferred in outdoor products, your products have extra resistance to yellowing and sun. The usage areas of these featured products are generally marine and automotive upholstery.

## Ecological Product

Thanks to our environmentally friendly policy in today's conditions, we are taking steps to contribute to the ecology of our products through the energy we receive from solar panels and the raw materials used in European standards. At the same time, none of our products contain phthalates.

## Cleanability

It is an extra feature used on the surface of the products and helps remove stains in the surface cleaning part.

## Burn Retardant

This feature, which is mostly used by our corporate and export customers, can be adjusted to the desired degree with the raw materials that cause the product to seriously delay the burning time. You can request samples of the CRIB 5 and M1 non-flammable products in our collection and test them as you wish.

## Waterproof

This feature, which is found in many of the artificial leathers we produce, can be developed according to the sectors in which it will be used in line with the demands of our customers.

## Antibacterial

This desired feature in medical products is provided by our various raw materials used in European standards.
